

Rotavapor® R-100 Economical evaporation

The R-100 rotary evaporator is an entry level Rotavapor® to meet the essential needs in evaporation and BUCHI's high quality standards.

Economical

Designed to meet essential needs

Solid and proven

User-friendly design at well-known BUCHI quality

Expandable

Increase efficiency by expanding to a complete solution

R-100: Your most important benefits

Economical

- · Effective Rotavapor for limited budgets
- · Fundamental design fulfills essential needs of evaporation
- · High longevity thanks to high quality material

Solid and proven

- · Reliable operation due to robust design
- · Quick and ergonomic operation with smooth manual lift mechanism
- · Easy flask handling and vapor duct removal thanks to multifunctional Combi-Clip

Expandable

- · Easy operation by integrating interface, vacuum pump and recirculating chiller
- · Expandable with a wide range of accessories and various glass assemblies
- · Flexibility to use the independent heating bath for further applications

Complete your portfolio

Vacuum Pump V-100

Economical vacuum source

Interface I-100

Economical vacuum regulation

Recirculating Chiller F-100 / F-105

The easy way of cooling

Multivapor™ P-6 / P-12

Efficient evaporation for multiple samples
