

DR 2800™ Portable Spectrophotometer

Features and Benefits

More than 240 Analytical Methods and Chemistries

The Hach DR 2800 Portable Spectrophotometer can be used for more than 240 analytical methods. (Test parameters are listed on page 3.) These methods include more than 30 TNTplus™ reagent vial tests that provide innovative barcode labeling for reliable, automatic method detection. All of the chemistries and supplies needed for these tests are available from Hach. The spectrophotometer can store up to 50 user programs and 500 data points, including sample and operator ID.

Use a USB Memory Stick to Update the Instrument or Transfer Data

Easily update DR 2800 spectrophotometer systems and transfer measurement data with a USB memory stick. Use it to stay current as Hach releases new test methods and chemistries. Two USB ports on the instrument allow for a computer to be connected in one port, when used with an upcoming software package, while the other is used to connect the spectrophotometer to a memory device or hand-held bar code scanner.

Small Footprint and Large Touch Screen Interface

The small footprint of the DR 2800 spectrophotometer—only 8.7 by 13.1 inches—lets it easily fit into any lab as well as being completely portable. The touch screen display is intuitive to use and ergonomic in design.

Runs on Either Line Power or Battery Power

Use the DR 2800 spectrophotometer in the lab with regular line power or in the field with the optional lithium-ion battery.

Accommodates Multiple Cell Sizes and Sample Delivery Methods

The DR 2800 spectrophotometer holds eight types of Hach cells—including 1-in. square cells, 1x5-cm cells, 13-mm round vials (TNTplus), and 16-mm round vials. Three adapters are included with the spectrophotometer for other vial types such as 1-in. round/AccuVac® cells, multi-path 1-in./1-cm cells, 1x1-cm square cells, and Pour-Thru™ cells. The optional Pour-Thru cell kit is ideal for rapid liquid methods when high throughput of analysis is needed.

The Hach DR 2800 Portable Spectrophotometer offers automatic method detection when used with TNTplus reagent vials. It also has an intuitive touch screen user interface and accommodates a wide range of pre-programmed water analysis methods. The small footprint is an advantage whenever you need a reliable portable analytical tool.

TNTplus Reagent Vials Designed for the DR 2800 Spectrophotometer

Hach has developed TNTplus reagent vials for selected analytical methods that provide the following features when used with the Hach DR 2800 Portable Spectrophotometer:

- *Automatic method detection—the spectrophotometer automatically reads the bar code, identifies the appropriate method, and takes the measurement to help eliminate human error, saving time and money.*
- *No reagent blank is necessary—high quality vials, tight reagent production controls, 10-absorbance readings averaged for results determination, instrument calibration verification, and negligible instrument drift, all combine to eliminate the need to run reagent blanks.*
- *Built-in accuracy—while rotating the vial, the spectrophotometer takes 10 absorbance measurements in less than 5 seconds. The average value is used to calculate the results.*
